

Bridge2brands, an innovative Biobridges format to connect brands and bio-based solutions providers

More and more often, consumers are choosing brands that make responsible use of the world's finite resources, support an eco-conscious lifestyle and strive to make a lasting, positive social and environmental difference around the globe.

To facilitate the connection and collaboration between Bio Based Industries and Brands, [Biobridges](#) project launched the **bridge2brands** initiative, an innovative format to connect brands willing to embrace a more sustainable approach in their business and bio-based industries and research players providing ground-breaking solutions to the specific challenges identified by the Brands.

Success Story: bridge2brands for P&G

Sustainable, Circular and Bio-based Materials and Solutions for Braun and Oral-B

In collaboration with **Procter & Gamble (P&G)**, **Biobridges** project has launched the first **bridge2brands** call to find innovative and more sustainable solutions for Braun & Oral-B products. .

Disposable, non easy to recycle everyday items, contribute to the waste issue. “Less throwaway” is a very clear expectation for every business nowadays, given an increased focused on sustainable growth from consumers and retail partners. In this context, P&G objective is to leverage the scale of their leadership brands as a force for good, promoting and enabling more responsible consumption amongst consumers, while also reducing overall waste and the usage of virgin materials in their products.

The focus areas include:

- Circular and/or Bio-based solutions and **materials** for manual toothbrushes (*P&G - Oral-B*)
- Bio-based **liquid solutions** for electric shavers cleaning systems (*P&G - Braun*)
- Bio-based **plastic** or alternative disposable cartridge for electric shavers cleaning system (*P&G - Braun*)

The “call for innovation” phase, supported by intense promotional activities led by Biobridges, was closed on the 5th June 2020. Out of the **52 high quality ideas** from Bio-based industries, SMEs, Start-ups, Research centres, and other bio-based solution providers from **22 countries** all over the world collected, **24 have been invited** to the online international workshop on 23-24 June 2020. They had the unique opportunity to **pitch their ideas to P&G** and discuss the advantages, pros and cons of their solutions to address the specific challenges identified, towards potential market dialogue and business partnership with the brand. The collaboration among the participants have been encouraged as well during the event.

The event ended with the presentation of the winners of the competition organised by the [BIOVOICES project](#) and the [Lazio Innova Startupper School Academy Program](#) between high-school students. The bioeconomy prize is awarded every year to two teams of “young innovators” by the [BIOVOICES project](#), the [European Bioeconomy Network](#) and [Novamont](#). During this last edition, the Startupper School Academy involved 121 institutes and 10.000 students to promote entrepreneurship and creativity in the Lazio Region High schools (Italy). The students proposed ideas for sustainable oral care, using bio-based solutions.

The Biobridges experience

“The bridge2brand concept was elaborated to address the needs of both Brands (the challenges owners) and Bio-based solutions providers (not only Bio-based industries, but also SMEs, Startups and Research bodies) of a format that ease the connection and collaboration between them” (Alexandre Almeida, GLOBAZ SA, Biobridges project coordinator).

“The experience with P&G was proactive and stimulating from the very first steps. We built the format based of real needs and context of one of the biggest Brands worldwide. The challenge was ambitious, but, leveraging on previous experiences and networks we reached great (replicable) results” (Susanna Albertini, FVA New Media Research, overall responsible for bridge2brands for P&G)

The P&G experience

“It is doubtless that we got lot of inspiration and we definitely have plans to follow up on some leads and decide whether / with whom following up. Net - in my Open Innovation role - have already enough elements to tick the event as successful and being eager to repeat similar ones with you in the future” (Raffaele Scocciati, R&D Open Innovation Manager at Procter & Gamble.)

“Impressive the diversity of ideas, concepts and solutions presented in a focused, short period of time”

“We appreciated the high quality of ideas submitted. We discovered such different sustainable approaches tackling same challenges. Some of the solutions are applicable in further brands beyond Oral b and Braun”

“So many connections with solution providers in the sustainability field in all maturity levels in such a short time”

“Great preparation and virtual organization of the innovation activity by Biobridges”

The participants experience

“Thanks to this event I’ve got the opportunity to pitch my solution to famous Brands and Network opportunities in the future with similar minded people” (Professor Xiaobin Zhao, Cambond Ltd)

“Direct interaction with key stakeholders & cross-fertilisation”

“We had the possibility to collaborate and communicate with big companies to improve our solution”

Next bridge2brands edition

The next edition of the bridge2brands initiative is scheduled for autumn and will focus on [FCA](#) - Fiat Chrysler Automobiles.
